REPORT

NAME: L.KAVYA SRI

SECTION: CSE 1

ROLL NO: 35

TASK-1

CASE NO: 08

CASE NAME: ONLINE FOOD ORDERING WEBSITE

Design a food ordering interface with restaurant details, menu categories, food images, prices, special offers, customer reviews, and order buttons. use card layouts, attractive backgrounds, and mobile-friendly navigation.

The Food Ordering Website helps customers explore food items and choose their favourite dishes online.

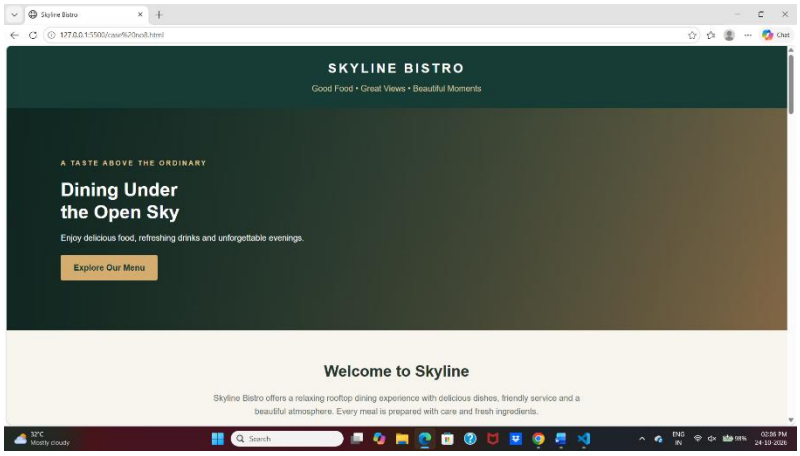

- Restaurant Details: Displays the restaurant name, rating, location, and delivery information.
- Menu Categories: Organizes food into categories such as Starters, Main Course, Pizza, Burgers, and Desserts.
- Food Images and Prices: Shows each dish with an image, name, and price using attractive card layouts.
- Special Offers: Highlights discounts, combo meals, and special deals.
- Customer Reviews: Displays ratings and feedback to help customers choose their food.
- Order Buttons: Provides buttons for customers to select and order their favourite dishes.
- Attractive Design: Uses suitable colors, backgrounds, spacing, and CSS styling to create a professional appearance.
- Mobile-Friendly Navigation: Makes the website easy to view and navigate on mobile phones, tablets, and computers.

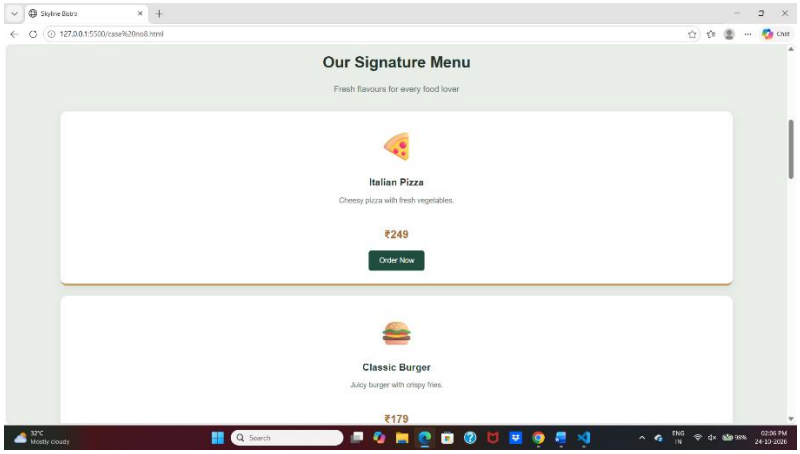

Technologies Used:

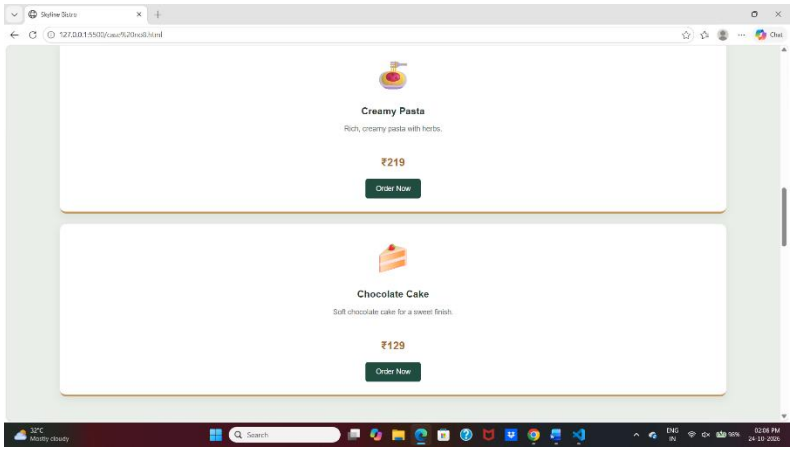

- HTML: Creates the structure and content of the website.

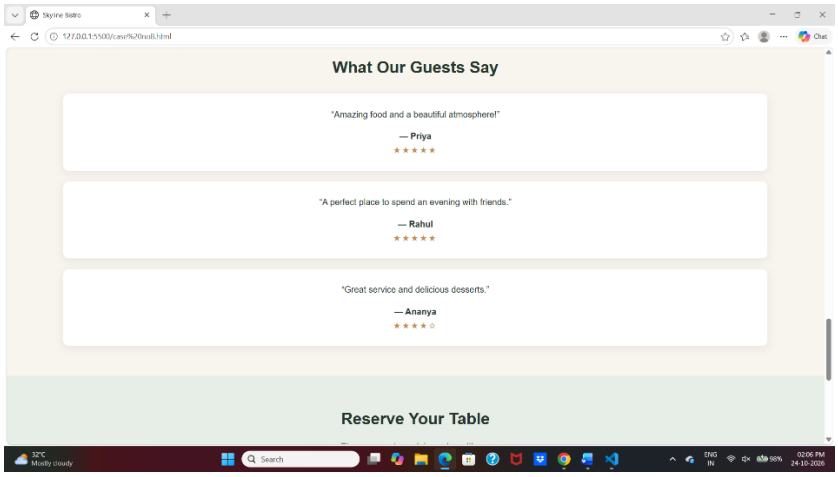

- CSS: Adds colors, layouts, card designs, backgrounds, and responsive styling.

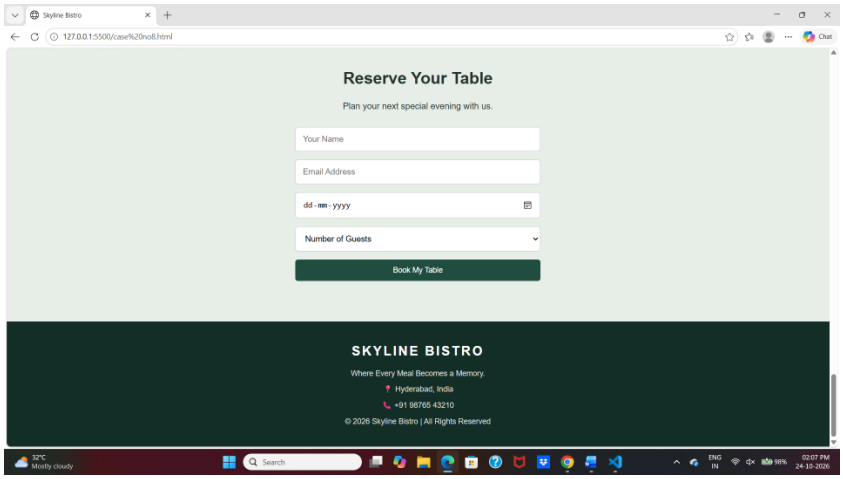

Conclusion: This project demonstrates the basic concepts of web development by creating an attractive, organized, and user-friendly online food ordering interface.

TASK-2

CASE NO: 19

CASE NAME: Adventure and trekking Website

Build a website showcasing trekking routes, camping trips, difficulty levels, trip schedules, equipment checklists, safety guidelines, and package prices. Use image overlays and visually distinct information panels.

Introduction:

The Adventure and Trekking website is designed for people who love nature, trekking, and outdoor activities.

Main Features:

- Trekking Routes: Displays popular trekking destinations and route details.

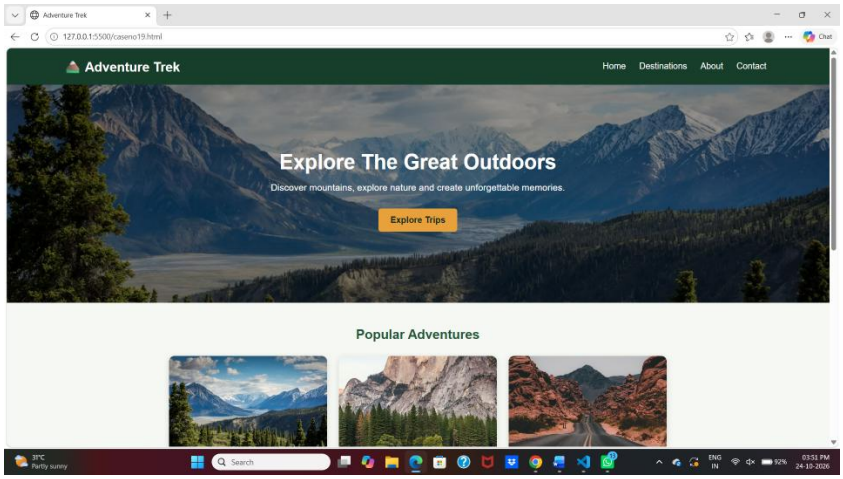

- Camping Trips: Provides information about camping locations and activities.
- Difficulty Levels: Shows easy, moderate, and difficult trekking routes.
- Trip Schedules: Displays trip dates, timings, and durations.
- Equipment Checklist: Lists essential items such as backpacks, water bottles, shoes, and first-aid kits.
- Safety Guidelines: Provides important safety instructions for trekkers.
- Package Prices: Shows trip costs and available packages.

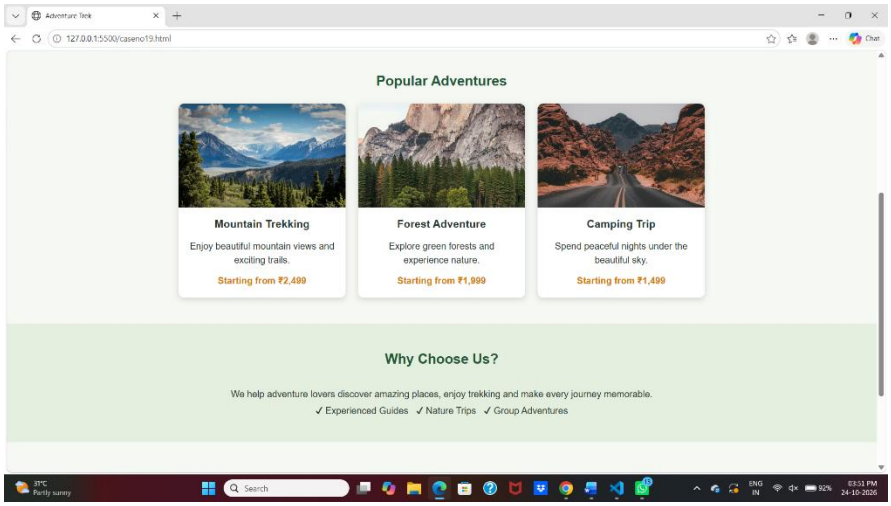

Design:

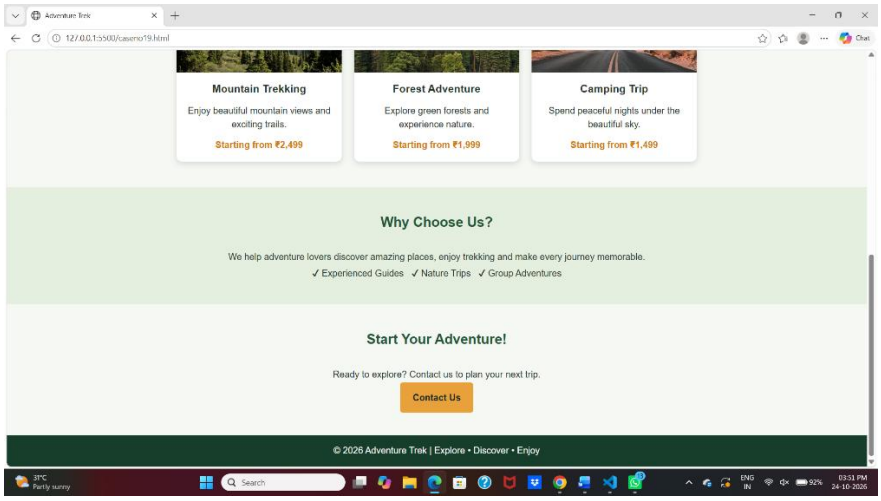

The website uses HTML and CSS to create image overlays, attractive backgrounds, and visually distinct information panels. Its responsive layout helps users browse the website on mobile phones and computers.

Conclusion:

This website helps users explore adventure destinations, compare trekking packages, prepare for trips, and understand essential safety measures before starting their journey.

TASK-3

CASE NO: 27

CASE NAME: BUSINESS ANALYTICS DASHBOARD

Design an analytics dashboard displaying revenue, users, sales trends, performance metrics, charts, and recent activities. Use CSS Grid, dashboard cards, side navigation, and responsive data tables.

Introduction:

The Analytics Dashboard provides a simple and organized view of important business information in one place.

Main Features:

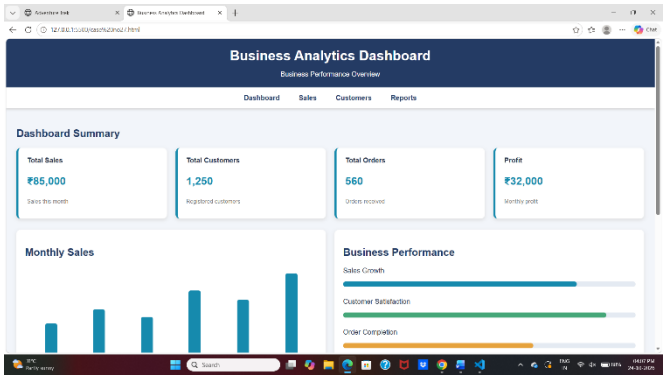

- Revenue: Displays total income generated by the business.
- Users: Shows the total number of users and user growth.
- Sales Trends: Presents sales performance over time using charts.
- Performance Metrics: Displays important business statistics and progress.
- Charts: Uses visual graphs to make data easy to understand.
- Recent Activities: Shows the latest transactions, updates, and user actions.
- Side Navigation: Provides easy access to different dashboard sections.
- Responsive Data Tables: Organizes business records and adjusts to different screen sizes.

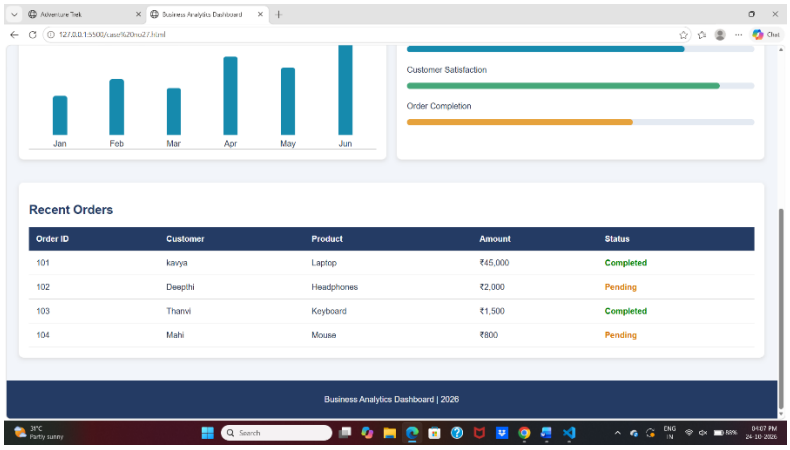

Design:

HTML structures the dashboard, while CSS styles the layout using CSS Grid, dashboard cards, colors, charts, and responsive design techniques.

Conclusion:

The Analytics Dashboard helps users monitor business performance, analyze sales trends, track revenue, and make better decisions through a clear and user-friendly interface.
